

**Claim Amendments:****RECEIVED  
CENTRAL FAX CENTER****OCT 30 2006**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) An apparatus comprising:  
a wireless wide area network telephone interface;  
a transceiver to communicate with a wireless local area telephone; and  
a first control module to transfer a call received at the wireless wide area network telephone interface to the transceiver when a wireless wide area network telephone is coupled to the wireless wide area network telephone interface, wherein the wireless wide area network telephone comprises a first display, and wherein information associated with the call is displayed on the first display;  
a universal serial bus (USB) interface to communicate with a first type of external device;  
and  
a second data interface of a second type to communicate with a second type of external device.
2. (Canceled)
3. (Original) The apparatus of claim 1, wherein the wireless local area telephone comprises a wireless local area handset.
4. (Currently Amended) The apparatus of claim 1, ~~further comprising a wireless local area telephone having a visual display window~~ wherein the wireless local area telephone comprises a second display.
5. (Original) The apparatus of claim 4, wherein the wireless local area telephone comprises a desktop telephone.

6. (Original) The apparatus of claim 1, wherein the transceiver includes an antenna assembly responsive to a driver.
7. (Original) The apparatus of claim 6, wherein the driver is to communicate with the wireless local area telephone at approximately 2.4 GHz.
8. (Original) The apparatus of claim 6, wherein the driver is to communicate with the wireless local area telephone at approximately 5.8 GHz.
9. (Original) The apparatus of claim 1 wherein the wireless wide area network telephone is a PCS telephone.
10. (Original) The apparatus of claim 1, further comprising:  
a speaker;  
a second control module to communicate an incoming voice portion of the call received at the wireless wide area network telephone interface to the speaker.
11. (Original) The apparatus of claim 1, further comprising:  
a microphone; and  
the second control module to provide an outgoing voice portion received at the microphone to the wireless wide area network interface.
12. (Original) The apparatus of claim 11, further comprising an alphanumeric keypad.
- 13 - 17. (Canceled)
18. (Original) The apparatus of claim 1, further comprising a battery charger for charging a battery in the wireless wide area network telephone.
19. (Original) The apparatus of claim 1, further comprising:  
a battery charger for charging a battery in the wireless wide area telephone; and  
a battery charger for charging a battery in the wireless local area telephone.

20. (Canceled)

21. (Previously Presented) The apparatus of claim 1, wherein the first type of external device is a personal computer (PC).

22. (Previously Presented) The apparatus of claim 1, wherein the first type of external device is a camera.

23. (Previously Presented) The apparatus of claim 1, wherein the first type of external device is a personal data assistant (PDA).

24. (Previously Presented) The apparatus of claim 1, wherein the first type of external device is a digital storage card.

25. (Previously Presented) The apparatus of claim 1, wherein the second data interface is a universal serial bus (USB) interface.

26. (Previously Presented) The apparatus of claim 1, wherein the second data interface is a portable media reader and/or writer interface.

27. (Currently Amended) A method comprising:  
receiving an incoming call signal from a wireless wide area network telephone at a base station;  
initiating communication from the base station to a wireless local area telephone in response to receiving the incoming call signal, wherein information associated with the call is displayed at a display of the wireless local area telephone when the wireless wide area network telephone is docked at the base station; and  
communicating with an external device through a universal serial bus (USB) interface.

28. (Original) The method of claim 27, further comprising charging the wireless wide area network telephone from the base station.

29. (Original) The method of claim 28, further comprising charging the wireless local area telephone from the base station.

30. (Canceled)

31. (Canceled)

32. (Previously Presented) The method of claim 27, wherein the external device is a personal computer (PC).

33. (Previously Presented) The method of claim 27, wherein the external device is a camera.

34. (Original) The method of claim 27, further comprising communicating with an external device through a second standardized interface.

35. (Original) The method of claim 34, wherein the second standardized interface is a portable media reader/writer standardized interface.

36. (Original) The method of claim 34, wherein the external device is a digital storage card.

37. (Currently Amended) A method comprising:

receiving an outgoing call request signal at a base station from a wireless local area telephone;

initiating from the base station a call to be made from a wireless wide area network telephone in response to receiving the outgoing call request signal;

communicating with an external device through a universal serial bus (USB) interface;

and

displaying information associated with the call on a display of the wireless wide area network telephone when the wireless wide area network telephone is coupled to the base station.

38. (Original) The method of claim 37, further comprising charging the wireless wide area network telephone from the base station.

39. (Original) The method of claim 38, further comprising charging the wireless local area telephone from the base station.

40. (Canceled)

41. (Canceled)

42. (Previously Presented) The method of claim 37, wherein the external device is a personal computer (PC).

43. (Previously Presented) The method of claim 37, wherein the external device is a camera.

44. (Original) The method of claim 37, further comprising communicating with an external device through a second standardized interface.

45. (Original) The method of claim 44, wherein the second standardized interface is a portable media reader/writer standardized interface.

46. (Original) The method of claim 44, wherein the external device is a digital storage card.

43-49. (Canceled).

50. (New) The apparatus of claim 4, further comprising an alphanumeric keypad, wherein at least one of the first display and the second display is responsive to the alphanumeric keypad.

51. (New) The apparatus of claim 4, wherein at least one of the first display and the second display is responsive to text messages from the wireless wide area network telephone.

52. (New) The apparatus of claim 4, wherein at least one of the first display and the second display is a liquid crystal display (LCD) capable of displaying video images received from a wireless wide area network.
